F. 931 986 076

We remind you that IRODaT database is hosted in www.irodat.org. Its access is opened to any Internet user, becoming a free and easy space where the information about the organ donation and transplantation activity from more than 80 countries can be directly consulted.

*The International Registry
of Organ Donation
and Transplantation,
a database that provides
information by country
of donation
and transplantation activity*

Organ transplantation is the best therapeutic alternative for patients with terminal organ failure. The transplant procedures are only possible with the parallel development of a program of organ donation.

Currently there are 103 countries in the world which perform transplant activity, but only 9.7% of them achieved good donation figures

The World Health Organization in its resolution WHA63.22 from May 2010, has requested to the countries to collect data on the practices of transplantation highlighting the importance of develop registries in this area.

Organ donation and transplantation data availability can help to the overall improvement of this activity in the world. Worldwide register's existence could give transparency to the donation activity and may contribute to the elimination of organ trafficking and transplantation tourism. In addition to determine the impact of governmental projects can be analyzed.

What IRODaT is?

The International Registry in Organ Donation and Transplantation (IRODaT) was created in 1998 as initiative of Transplant Procurement Management (TPM) program with the aim of support the transplant community by providing up-to-date data on organ donation and transplantation worldwide. It becomes IRODaT the oldest register in this area.

The IRODaT is a friendly open registry accessible to all professionals who are involved direct or indirect with donation and transplantation. As well as IRODaT is able to provide basic statistics with a short timeframe, based on a

network of experts involved in the organ donation and transplantation process worldwide.

News

In order to continue supporting the transplant community, IRODaT have developed a new database is hosted in www.irodat.org

New levels of data reporting have been opened : National,–Regional-Hospital. Hence, any similarities or differences between countries, regions and/or centers can be identified.

National and comparative statistics carried out on an international basis can be provided. They have turned out to be of an extreme value to scientific programs, social and governmental bodies.

How join us?

National, Regional and Hospital health organizations are invited to participate in the project once they start to announce their organ donation activity among the international community.

Please contact info@irodat.org and we will be pleased to include your information in the IRODaT database. Furthermore, specific requests can be sent to this contact address in order to obtain more detailed information about worldwide donation and transplantation activity
