IRODaT
INTERNATIONAL REGISTRY in ORGAN DONATION AND TRANSPLANTATION
www.irodat.org
Final Numbers 2012
Dear colleagues

On behalf of all IRODaT Staff, we are glad to present the final numbers of 72 countries in worldwide organ donation and transplantation activity from 2012. As every year, you, the official reporters, are the first ones to receive this international information.

As we have been doing, from the International Registry in Organ Donation and Transplantation – IRODaT would like to welcome the new reporters from Malta, Sudan, Ireland and Tunisia, which have also kindly provided their own statistics. All of them join IRODaT Registry in order to increase our network and help the health professionals, researchers and general community to have access to verified and validate information.

In this edition of IRODaT newsletter is presented the worldwide donation and the general transplantation activity (kidney, liver, pancreas, heart, and lung) from actual deceased donors, donors after cardiac death –DCD- and living donors. Before long, this information will be published in official journals.

We also are very glad to introduce our new webpage www.irodat.org. Now, we offer an improved interphase, a better information visualization and more intuitive navigation. Of course, you will find materials –as this newsletter- available to download. We also would like to present our Twitter @IRODaT_DTI where you may be constant informed and where you may find, for example, other members of IRODaT community. Follow us!

Once again, we would like to thank all your effort to develop the IRODaT network, and encourage the donation and transplantation activity in your own countries.

Never forget that life is a gift that must be cared.

Thank you!

IRODaT Team
1. WORLDWIDE DONATION ACTIVITY

The International Registry in Organ Donation and Transplantation – IRODaT presents, in the next figures, the worldwide living and actual deceased donation activity from 2012 in pmp numbers. It is also included an extra graph where is represented the numbers of the Organ Donors after Cardiac Death. After those it is showed the same activity separated in four big regions: Europe, America, Asia – Oceania and Africa – Middle East. All of them are compared with the numbers of the previous year 2011.

Remind that all this information and figures, as well as this Newsletter is available in IRODaT website www.irodat.org

International Registry in Organ Donation and Transplantation

October 2013

IRODaT Newsletter | 14
2. TRANSPANTATION ACTIVITY

IRODaT presents -in this section- the transplantation worldwide activity from 2012. It is divided in 7 different figures, which each one represent a different organ transplant activity (kidney, liver, heart, lung and pancreas).

The case of kidney and liver organs are divided into two figures; one for transplant from deceased donors and the other for transplant from living donors.

All graphs are represented in pmp, and the case of transplant from deceased donors’ numbers had included all combinations.

Remind that all this information and figures, as well as this Newsletter is available in IRODaT website www.irodat.org
