Preliminary Numbers 2016
Dear colleagues

On behalf of all IRODaT staff, we are glad to present the 2016 preliminary numbers in organ donation and transplantation.

IRODaT mission is to support the healthcare professionals, transplant specialist, researchers and general community to have access to verified and validated information.

We invite you to visit IRODaT website www.irodat.org, where you will find information from other countries and other news regarding international organ donation and transplantation.

Once again, we would like to thank all your effort to develop the IRODaT network, and encourage the donation and transplantation activity in your own countries.

2. TRANSPLANTATION ACTIVITY

IRODaT presents -in this section- the transplantation worldwide activity of 2016. It is divided in 7 different figures, which each one represent a different organ transplant activity (kidney, liver, heart, lung and pancreas).

The case of kidney and liver transplant are divided into two figures; one for transplant from deceased donors and the other for transplant from living donors.

All graphs are represented in pmp, and the figures regarding transplant from deceased donors’ numbers had included all combinations.

Remind that all this information and figures, as well as this Newsletter is available in IRODaT website www.irodat.org
